Two Immediate Hires

Professor Tour seeks to hire a synthetic organic chemistry post doc to work on nanomachine synthesis for drilling into cells. They must be clear to work in the US for at least one year, and the sooner that they can begin the better.

He also seeks a post doc or MS student with expertise to help in a carbon nanoparticle synthesis project.

Email resume to:

James M. Tour, Ph.D.
T. T. and W. F. Chao Professor of Chemistry
Professor of Computer Science
Professor of Materials Science and NanoEngineering
Rice University
