*The Department of Mathematics may, after consultation with a student concerning his/her previous math preparation, recommend that a student be placed into a higher level math course than that for which the student has received official credit. The Department of Chemistry will accept this waiver of the math classes upon a written confirmation of the waiver from the Department of Mathematics and upon the student’s successful completion of the higher level math course. Note: MATH 211 is encouraged for students interested in graduate study.

*Normally completed before the end of junior year. Enrollment in CHEM 391 (at least 3 credits) requires advance permission. See course guide for details.

**Additional independent research or laboratory coursework in chemistry must be completed to total eight (8) credit hours (including CHEM 391). This requirement may be satisfied by taking one or more of the following: (i) CHEM 491, (ii) CHEM 492 and 493, and (iii) additional laboratory course(s) in chemistry at the 300-level or above. Up to two (2) credits of CHEM 700 may be used toward this requirement.

### Advanced Course Work (Twelve Credit Hours)*

Each student must complete advanced work that satisfies one of the specialization tracks listed below. A student may, with the approval of the Director of the Undergraduate Program, propose a track in another specialization. See the General Announcements for details.
