Total = 117 credit hours

Note: The above sample degree plan assumes that Chemistry AP credit was earned upon entering Rice, which would satisfy CHEM 111/113. While the above sample degree plan suggests 19 credit hours of independent research, the B.S. degree requires only 8 credit hours. There is a lot of flexibility in the completion of advanced coursework. However, not all courses are taught every year- consult with your major advisor about your course plan.
